

Innovation, made easy!

Program Essentials

Implementing Phrazer enabled Communication and Information Theory Empowered (CITE) Methodologies is a complex and innovative process that results in high rewards for your system. To successfully complete this system transformation process, the following key elements are required:

- Clear objectives
- Commitment from Executive and Leadership Team
- Assigned resources for program
- Defined strategy to engage stakeholders
- Development of change agents and Phrazer Champions within the organization

Inspiring Collaboration

GeaCom's CITE and implementation specialists collaborate with your medical and process experts to design a program that empowers you to achieve your mission. Experience an inspiring partnership that offers new and effective pathways to meet existing and future goals.

Secure and Efficient Integration

The Phrazer Systems integrate seamlessly without any infrastructure adjustments requirements. Connecting the Phrazer System to your EHR only requires 3 hours of your IT team's time if the connection is enabled via Redox, GeaCom's preferred integration partner.. Minimal effort and resources open efficiency opportunities for your system though Phrazer's Multi-Path-Real-Time Messaging (MRM) features.

Staff Training and Support

GeaCom's implementation team supports you with training sessions for staff and provides onsite support for your "go-live" and beyond. Your assigned account manager provides status reports, supports your communication strategies with stakeholders and ensures that your innovative ideas become a reality with Phrazer/Kitsune.

At GeaCom, we are committed to providing excellent services and innovative solutions that empower you to harmonize patient, staff and system performance.

Phrazer Kitsune®

Harmonizing Patient, Staff and System Performance!
